### Fixed Income Market Update: September 2017

#### Key Market Highlights:

- During the month, while money market rates remained benign, gilt and corporate bond yields rose on the back of rise in global bond yields, OMO sales and rise in inflation.
- The ten year gilt benchmark closed the month at 6.66%, 14 bps higher from previous month. The ten year AAA Corporate bond benchmark closed at 7.53%, 8 bps higher than previous month. The five year AAA corporate bond benchmark closed at 7.25%, 3 bps higher as compared to previous month. Ten year SDL spreads remained stable at around 70-75 bps to the new gilt benchmark.
- 1 year CD rates closed at 6.55%, 8 bps higher than previous month. 1 year T bill yield closed at similar levels at 6.23%. 3 month CD rates closed at 6.18% and 3 month T bill yields fell to 6.07%, 1 bps lower than previous month.
- Brent Crude oil prices rose during the month to USD 56.5 per barrel on improving demand forecast and expectation of further output cuts. INR depreciated and closed the month at 65.28 as compared to 63.90 the previous month. For the month of September, FIs turned net sellers in the debt market to the tune of ₹ 31,525 cr. During the month RBI removed masala bonds from the total FII limit for corporate bonds thereby freeing up ₹ 44000 crore for fresh investments. India's August trade deficit printed at USD 11.64 billion as compared to USD 11.45 bn in July 2017.
- The ten yr benchmark US treasury yield rose by 22 bps to 2.33 as the Fed signaled a hawkish policy with one more rate hike expected in by Dec 2017.
- August WPI data release came at 3.24% as compared to 1.88% in previous month. CPI for August came at 3.36% compared to 2.36% in previous month.
- July Industrial production (IIP) growth came at 1.2% compared to -0.2% for previous month.
- Banking system liquidity remained well in surplus mode. RBI conducted ₹ 20,000 crore worth of OMOs of dated g-secs. Banks lent on an average ₹ 2.17 Lakh Cr at various RBI liquidity facilities put together.

- RBI also released govt's borrowing calendar for the second half of the year. It has remained unchanged at Rs 2.08 lakh crore as per budgeted estimates. However fears of slippage and extra borrowing kept yields on higher side.
- SEBI released a circular on IRFs to allow imperfect (duration) hedging subject to certain limits.
- At its Monetary Policy Review held on 4th October, the MPC kept key rates unchanged by voting 5-1 in favour. RBI maintained its neutral stance while reducing the FY18 GVA growth forecast to 6.6%, from 7.3% earlier. The SLR has been cut by 50 bps to 19.50%. RBI highlighted concerns on fiscal front cautioning that fiscal slippage can lead to higher inflation. A significant first step has been taken in this policy to address the risk asymmetry in pricing of SDLs of different states where fiscally prudent states do not enjoy much of a premium over fiscally profligate states. To address this, as a beginning RBI would publish High frequency data relating to finances of state governments on its website which can be accessed by investors. With States borrowing ever higher amounts, RBI has also decided to schedule State Loan Auctions on a weekly basis rather than the present fortnightly basis. RBI has also said they would undertake consolidation of SDLs to even out redemption pressures.
- Gilt yields have risen post policy as a negative reaction to the announcements. The ten year gilt benchmark was trading at 6.72 a day after the policy announcement.

#### Fixed income market outlook:

- Banking system liquidity to remain in surplus zone, however the quantum of surplus is expected to be lower than previous month and in a range of ₹ 1.5 Lakh to 2 Lakh Cr. There could be further OMO issuances to suck out durable liquidity.
- Short term Money market rates are expected to remain stable on back of low CD issuance and surplus banking system liquidity. Short term corporate bond yields to remain stable to lower on back on attractive carry and defensive bet.
- The ten year benchmark may trade in a range of 6.65% to 6.80% in the near term due to supply concerns and rising global bond yields. However as absolute yields look attractive intermittent buying may emerge.

### Equity Markets

#### Review of Equity Markets for the month of September

The Indian equity markets were weak in September as shown in table below. FII flows were negative for the second consecutive month (at USD 1.65 Billion) while mutual funds used the weakness to buy (about USD 2.4 Billion, according to Citi estimates). FII flows into EMs as a category were positive however at USD 5.3 Billion for the month (JPM data, till Sep 27). The developed markets globally did better than the emerging markets and the MSCI World Index was up 2.1% while the MSCI EM (USD) index was down 0.5% during the month. The global economy, particularly manufacturing, is seeing strong tailwinds, with strong PMIs. The US Fed announced its balance sheet roll-off, as expected, from October. It starts at USD 10 billion a month (USD 6 billion of treasuries, USD 4 billion of mortgage-backed securities), increases @ USD 10 billion every quarter till it reaches USD 50 billion and continues at that pace thereafter. The ECB and the Japanese central bank continue their asset purchases however, and the winding down of the Fed balance sheet should not have an effect in the near term.

The headline CPI inflation rose 3.4% y-o-y in August versus 2.4% in July, above expectations. The main surprise was the sharp jump in core CPI inflation (ex-food & beverage, fuel) to 4.6% from 4.1%, reflecting higher petrol prices, the house rent allowance impact, but also the impact of GST for the second consecutive month. The GDP growth for the first quarter had come in at 5.7% and private sector investment has remained weak. There has been talk of the government relaxing the fiscal deficit target for FY 18 to give a push to the economy. We think that as the government spend is already strong this year compared to that of the last year (probably because the budget was earlier this year), there is little space for the government to increase spending. The private sector currently has low appetite for new projects. Projects only worth ₹ 84,000 crores were announced in the last quarter, which is a several quarter

low. However, what the government can do, and is attempting, is the resolution of stalled projects, as nearly 21% of projects being undertaken by the private sector are stalled.

The Rupee weakened 2.1% in the month as net capital flows were negative in equity and were virtually zero in debt. The Dollar Index (DXY) regained its losses and was up marginally in the month. It was driven by a hawkish Fed and hopes of a tax plan getting through the US congress. Crude prices (Brent) strengthened nearly 10% in the month. Gold (-3.2%) and silver (-5.3%) prices weakened as a more hawkish Fed trumped tensions around North Korea.

Export growth picked up to 10.3% y-o-y in August, from 3.9% y-o-y in July, but imports accelerated even further at 21% y-o-y, widening the trade deficit. The CRB index of raw industrials was down 1.25%. Copper was down 4.5% and Aluminium and zinc virtually flat. Iron ore however, was down 21% as inventories in China ports remained high. Overall fundamentals for metals however, remained supportive i.e. a low level of inventories and strong global growth.

While the economic growth has been moderate, consumer sentiment is holding up, at least in the automobile sector. Domestic PVs witnessed double digit growth on account of inventory built up for upcoming festive season and better traction from retail sales. Domestic 2Ws registered double-digit growth, led by strong rural demand and growth in scooters. MHCVs saw more than 20% growth despite muted bus sales, owing to strong growth in cargo segment. Strong growth was driven by healthy freight rates, higher sales from infra sector and pent up demand. Finally, tractor demand has shown a growth of double digits in the first half of the year.

With the monsoon season over, the cumulative rainfall for the season was 5% less than normal. This has been considered to be quite satisfactory by the IMD with only 6 met regions witnessing less than normal monsoon. These are Eastern and Western UP, Haryana, Chandigarh, Delhi, Punjab, Eastern Madhya Pradesh and Vidarbha. Some of them have good access to irrigation facilities. The impact on cropping progress and output prospects has been mixed. However, overall there are no major concerns on agricultural output as projected output levels for some crops, though lower than that for Kharif 2016 are still higher than that in Kharif 2015. However, reservoir levels overall are lower than this time last year which may have an impact on the rabi crop. In the kharif season, production is expected to be good, except in case of pulses (esp. tur) and oilseeds which may lead to some inflationary pressures.

## SECTOR ALLOCATION (TOP 10) (As on September 29, 2017)

# Principal SMART Equity Fund (An open-ended equity scheme)

## FUND FEATURES (As on September 30, 2017)

MAAUM: ₹ 180.92 crore • AUM: ₹ 181.54 crore

NAV Per Unit: (As on September 29, 2017)

	Direct Plan	Regular Plan
Growth Option :	₹ 20.16	₹ 19.28
Dividend Option (Monthly) :	₹ 16.96	₹ 15.55

**INVESTMENT OBJECTIVE:** The primary objective of the scheme is to seek to generate long term capital appreciation with relatively lower volatility through systematic allocation of funds into equity; and in debt /money market instruments for defensive purposes. The Scheme will decide on allocation of funds into equity assets based on equity market Price Earning Ratio (PE Ratio) levels. When the markets become expensive in terms of 'Price to Earnings' Ratio; the Scheme will reduce its allocation to equities and move assets into debt and/or money market instruments and vice versa.

Inception Date - March 31, 1996

Different plans shall have a different expense structure. Returns shown above are for Regular Plan - Growth option. **Past performance may or may not be sustained in the future.**

The returns shown above are calculated using XIRR approach (CAGR Returns) assuming investment of ₹ 10,000/- on the 1st business day of every month. XIRR helps in calculating return on investments given an initial and final value and a series of cash inflows and outflows with the correct allowance for the time impact of the transactions. Load is not taken into consideration for computation of performance.

For performance of all schemes, Investors are advised to refer 'Returns' section on page 27-30. **Disclaimer:** The above investment simulation is for illustrative purposes only and should not be construed as a promise on minimum returns and safeguard of capital. The AMC / Mutual Fund is not guaranteeing or promising or forecasting any returns. SIP does not assure a profit or guarantee protection against a loss in a declining market.

Dhimant Shah manages Principal Large Cap Fund w.e.f July 2017

Inception Date - July 27, 1999

Different plans shall have a different expense structure. Returns shown above are for Regular Plan - Growth option. **Past performance may or may not be sustained in the future.**

The returns shown above are calculated using XIRR approach (CAGR Returns) assuming investment of ₹ 10,000/- on the 1st business day of every month. XIRR helps in calculating return on investments given an initial and final value and a series of cash inflows and outflows with the correct allowance for the time impact of the transactions. Load is not taken into consideration for computation of performance.

For performance of all schemes, Investors are advised to refer 'Returns' section on page 27-30.

**Disclaimer:** The above investment simulation is for illustrative purposes only and should not be construed as a promise on minimum returns and safeguard of capital. The AMC / Mutual Fund is not guaranteeing or promising or forecasting any returns. SIP does not assure a profit or guarantee protection against a loss in a declining market.

P.V.K. Mohan manages Principal Personal Tax Saver Fund and Principal SMART Equity Fund w.e.f July 01, 2017

Bekxy Kuriakose is managing debt portion of Principal Balanced Fund w.e.f March 2016.

- It is assumed that the mutual fund units are held as capital assets by the investors.
- Plus applicable surcharge [refer note 9], if any, and Education Cess at the rate of 2% on income-tax and surcharge and Secondary and Higher Education cess at the rate of 1% on income-tax and surcharge.
- Securities Transaction Tax ('STT') is applicable only in respect of sale of units of Equity-Oriented Funds ('EOFs') on a recognised stock exchange and redemption of EOUs by the mutual fund. Purchase/ sale/ redemption of units other than EOUs are not subject to STT.
- Non-resident investors shall be entitled to be governed by provisions of the applicable Tax Treaty, which India has entered with the country of residence of the non-resident investor, if that is more beneficial than the provisions of the Income-tax Act, 1961 ('the Act'), subject to certain conditions. As per section 90(4) of the Act, a non-resident shall not be entitled to claim treaty benefits, unless the non-resident obtains a Tax Residency Certificate of being a resident of his home country. Furthermore, as per section 90(5) of the Act, non-resident is also required to provide such other documents and information, as prescribed by CBDT, as applicable.
- As per section 112 of the Act, long-term capital gains in case of non-residents would be taxable @ 10% on transfer of capital assets, being unlisted securities, computed without giving effect to first & second proviso to section 48 i.e. without taking benefit of foreign currency fluctuation and indexation benefit.
- Section 196D of the Act provides that no tax is required to be withheld for payment to a FII / FPI in respect of capital gains arising on transfer of units.
- As per provisions of Section 206AA of the Act, if there is default on the part of a non-resident investor (entitled to receive redemption proceeds from the Mutual Fund on which tax is deductible under Chapter XVII of the Act) to provide its Permanent Account Number, the tax shall be deducted at higher of the following rates: i) rates specified in relevant provisions of the Act; or ii) rate or rates in force; or iii) rate of 20%. However, the provisions of section 206AA of the Act shall not apply, if the requirements as stated in Rule 37BC of the Income-tax Rules, 1962, are met.
- "Infrastructure debt fund" means an infrastructure debt fund as defined in clause 1 of the regulation 49L of the Securities and Exchange Board of India (Mutual Fund) Regulations, 1996. As per clause 1 of regulation 49L, an 'infrastructure debt fund scheme' would mean, a scheme which invests primarily (minimum 90% of scheme assets) in debt securities or securitized debt instrument of infrastructure companies or infrastructure capital companies or infrastructure projects or special purpose vehicles, etc. or other permissible assets in accordance with these regulations or bank loans in respect of completed and revenue generating projects of infrastructure companies or projects or special purpose vehicles.

(Contd. on next page)

# Tax Rates for Mutual Fund Investors<sup>1</sup> as per the Finance Act, 2017 – SNAPSHOT

9 Surcharge applicable for FY 2017-18:

Type of Investor	Surcharge rate as a % of Income-tax		
	If income is less than ₹ 50 lakhs	If income exceeds ₹ 50 lakhs but less than ₹ 1 crore	If income exceeds ₹ 1 crore
Individual, HUF, AOP (Resident & Foreign)	Nil	10%	15%

Type of Investor	Surcharge rate as a % of Income-tax		
	If income is less than ₹ 1 crore	If income exceeds ₹ 1 crore but less than ₹ 10 crores	If income exceeds ₹ 10 crores
Partnership firm (Domestic & foreign)	Nil	12%	12%
Domestic Company	Nil	7%	12%
Foreign Company	Nil	2%	5%

10 The FPI Regulations replaced the existing SEBI (Foreign Institutional Investor) Regulations, 1995 and the Qualified Foreign Investors framework, and are effective from 7 January 2014. As per Notification No. 9/2014 dated 22 January 2014, the Central Government has specified the Foreign Portfolio Investors registered under the Securities and Exchange Board of India (Foreign Portfolio Investors) Regulations, 2014, as 'Foreign Institutional Investor' for the purposes of clause (a) of the Explanation to section 115AD of the Act.

11 Rates are exclusive of surcharge at the rate of 12% and education cess at the rate of 3%.

12 Additional tax on income distributed to unit-holders would be levied on the amount of income to be distributed including such additional tax (i.e. grossing-up), as against levy on only the amount of income to be distributed, thereby resulting in a higher effective rate of tax on distributed income.

13 Capital gains arising on transfer or redemption of 'other than equity oriented units' should be regarded as long-term capital gains, if such units are held for a period of more than 36 months immediately preceding the date of such transfer.

14 Capital gains arising on the transfer or redemption of equity oriented units held for a period of more than 12 months, immediately preceding the date of transfer, should be regarded as 'long term capital gains'.

15 Tax shall be levied at 25% if the total turnover or gross receipts of the financial year 2015-16 does not exceed INR 50 crores.

## INCOME TAX RATES FOR INDIVIDUAL / HUF / AOP / BOI for AY 2018-19

Total Income	Tax Rates (c)
Up to ₹ 250,000 (a)(b)(d)	NIL
₹ 250,001 to ₹ 500,000	5%
₹ 500,001 to ₹ 1,000,000	20%
₹ 1,000,001 and above	30%

(a) In the case of a resident individual of the age of 60 years or more but less than 80 years, the basic exemption limit is ₹ 300,000.

(b) In the case of a resident individual of the age of 80 years or more, the basic exemption limit is ₹ 5,00,000.

(c) Plus, surcharge on income-tax, as applicable and education cess is applicable at the rate of 2% on income-tax and secondary and higher education cess at the rate of 1% on income-tax.

(d) Rebate of upto ₹ 2,500 available for resident individuals whose total income does not exceed ₹ 3,50,000.

## SECURITIES TRANSACTION TAX

### Equity Oriented Fund

STT on sale of a unit of equity oriented mutual fund to the mutual fund is levied at 0.001% (STT payable by the seller)

No STT is chargeable on purchase of units of an equity oriented mutual fund entered into in recognised stock exchange.

STT on sale of a unit of an equity oriented mutual fund where the transaction is entered into in recognized stock exchange and the contract for sale is settled by the actual delivery is levied at 0.001% (STT payable by the seller).

**Other than Equity Oriented Fund:** Purchase/ sale/ redemption of units other than equity-oriented units shall not be subject to STT.

Mutual Fund would also pay securities transaction tax wherever applicable on the securities bought/sold.

**As per Section 94(7):** The loss due to sale of Units in the schemes (where income distributed on MF units is tax free) will not be available for set-off to the extent of the tax free income distributed; if units are: (A) Bought within three months prior to the record date fixed for income distribution; and (B) sold within nine months after the record date fixed for income distribution.

**As per Section 94(8):** The loss due to sale of original Units in the schemes, where bonus Units are issued, will not be available for setoff; if original units are :- (A) Bought within three months prior to the record date fixed for allotment of bonus units; and (B) sold within nine months after the record date fixed for allotment of bonus units.

However, the amount of loss so ignored shall be deemed to be the cost of purchase or acquisition of such unsold bonus units held on the date of transfer of original units.

*This information is being provided for basic guidance for investments in mutual funds and is based on provisions of the Income-tax Act, 1961, as amended by the Finance Act, 2017. The tax implications may vary for each assessee based on the details of his income. All rates and figures appearing are for illustrative purposes only. Tax benefits are subject to change in tax laws. The AMC/Trustee/ Sponsor accept no liability whatsoever for any direct or consequential loss arising from any information provided in this note.*

# How to Read Factsheet

- **FUND MANAGER** - An employee of the asset management company such as a mutual fund or life insurer, who manages investments of the scheme. He is usually part of a larger team of fund managers and research analysts.
- **APPLICATION AMOUNT FOR FRESH SUBSCRIPTION** - This is the minimum investment amount for a new investor in a mutual fund scheme.
- **MINIMUM ADDITIONAL AMOUNT** - This is the minimum investment amount for an existing investor in a mutual fund scheme.
- **YIELD TO MATURITY** - The Yield to Maturity or the YTM is the rate of return anticipated on a bond if held until maturity. YTM is expressed as an annual rate. The YTM factors in the bond's current market price, par value, coupon interest rate and time to maturity.
- **SIP** - SIP or systematic investment plan works on the principle of making periodic investments of a fixed sum. It works similar to a recurring bank deposit. For instance, an investor may opt for an SIP that invests ₹ 500 every 15<sup>th</sup> of the month in an equity fund for a period of three years.
- **NAV** - The NAV or the net asset value is the total asset value per unit of the mutual fund after deducting all related and permissible expenses. The NAV is calculated at the end of every business day. It is the value at which the investor enters or exits the mutual fund.
- **BENCHMARK** - A group of securities, usually a market index, whose performance is used as a standard or benchmark to measure investment performance of mutual funds, among other investments. Some typical benchmarks include the Nifty, Sensex, BSE200, BSE500, 10-Year G-sec.
- **ENTRY LOAD** - A mutual fund may have a sales charge or load at the time of entry and/or exit to compensate the distributor/agent. Entry load is charged at the time an investor purchases the units of a mutual fund. The entry load is added to the prevailing NAV at the time of investment. For instance, if the NAV is ₹ 100 and the entry load is 1%, the investor will enter the fund at ₹ 101.  
Note: SEBI, vide circular dated June 30, 2009 has abolished entry load and mandated that the upfront commission to distributors will be paid by the investor directly to the distributor, based on his assessment of various factors including the service rendered by the distributor.
- **EXIT LOAD** - Exit load is charged at the time an investor redeems the units of a mutual fund. The exit load is deducted from the prevailing NAV at the time of redemption. For instance, if the NAV is ₹ 100 and the exit load is 1%, the redemption price would be ₹ 99 per unit.
- **MODIFIED DURATION** - Modified duration is the price sensitivity and the percentage change in price for a unit change in yield.
- **STANDARD DEVIATION** - Standard deviation is a statistical measure of the range of an investment's performance. When a mutual fund has a high standard deviation, it means its range of performance is wide, implying greater volatility.
- **SHARPE RATIO** - The Sharpe Ratio, named after its founder, the Nobel Laureate William Sharpe, is a measure of risk-adjusted returns. It is calculated using standard deviation and excess return to determine reward per unit of risk.
- **BETA** - Beta is a measure of an investment's volatility vis-a-vis the market. Beta of less than 1 means that the security will be less volatile than the market. A beta of greater than 1 implies that the security's price will be more volatile than the market.
- **AUM** - AUM or assets under management refers to the recent / updated cumulative market value of investments managed by a mutual fund or any investment firm.
- **HOLDINGS** - The holdings or the portfolio is a mutual fund's latest or updated reported statement of investments/securities. These are usually displayed in terms of percentage to net assets or the rupee value or both. The objective is to give investors an idea of where their money is being invested by the fund manager.
- **NATURE OF SCHEME** - The investment objective and underlying investments determine the nature of the mutual fund scheme. For instance, a mutual fund that aims at generating capital appreciation by investing in stock markets is an equity fund or growth fund. Likewise, a mutual fund that aims at capital preservation by investing in debt markets is a debt fund or income fund. Each of these categories may have sub-categories.
- **RATING PROFILE** - Mutual funds invest in securities after evaluating their creditworthiness as disclosed by the ratings. A depiction of the mutual fund in various investments based on their ratings becomes the rating profile of the fund. Typically, this is a feature of debt funds.

**MAAUM** - Monthly Average Asset Under Management

<sup>++</sup> ICRA has assigned credit risk rating of [ICRA]A1+mfs to Principal Low Duration Fund. The rating is the highest-credit-quality short-term rating assigned by ICRA to debt funds. Rating methodology used by ICRA is based on evaluating the inherent credit quality of the mutual funds portfolio. As a measure of the credit quality of a debt fund's assets, ICRA uses the concept of "credit scores", based on ICRA's assessment of credit risk associated with each exposure of the portfolio taking into account its maturity. To quantify the credit risk scores, ICRA uses its database of historical default rates for various rating categories for various maturity buckets. The credit risk ratings incorporate ICRA's assessment of a debt fund's published investment objectives and policies, its management characteristics, and the creditworthiness of its investment portfolio. ICRA reviews relevant fund information on an ongoing basis to support its published rating opinions. If the portfolio credit score meets the benchmark of the assigned rating during the review, the rating is retained. In an event that the benchmark credit score is breached, ICRA gives a month's time to the debt fund manager to bring the portfolio credit score within the benchmark credit score. If the debt fund manager is able to reduce the portfolio credit score within the benchmark credit score, the rating is retained. If the portfolio still continues to breach the benchmark credit score, the rating is revised to reflect the change in credit quality. The ratings should, however, not be construed as an indication of the prospective performance of the Mutual fund scheme or of volatility in its returns. ICRA ratings should not be treated as recommendation to buy, sell or hold the rated debt instruments. ICRA ratings are subject to a process of surveillance which may lead to a revision in ratings. **Source:** ICRA Ltd.

<sup>++</sup> CARE's fund credit quality rating is not a recommendation to purchase, sell, or hold a security / fund. It neither comments on the current market price, suitability for a particular investor nor on the prospective performance of the fund with respect to appreciation, volatility of net asset value (NAV), or yield of the fund. The ratings do not address the funds ability to meet the payment obligations to the investors. The ratings are based on current information furnished to CARE by the issuer or obtained by CARE from sources it considers reliable. CARE does not, however, guarantee the accuracy, adequacy or completeness of any information and is not responsible for any errors or omissions or for the results obtained from the use of such information. CARE does not perform an audit in connection with any rating and may, on occasion, rely on unaudited information. The ratings may be changed, suspended, or withdrawn as a result of changes in, or unavailability of, such information, or based on other circumstances. Funds rated by CARE have paid a rating fee.
