SECTION IV. INTRODUCTION

A. RISK FACTORS

Standard Risk Factors:

- Investment in mutual fund Units involves investment risks such as trading volumes, settlement risk, liquidity risk, default risk, including the possible loss of principal.
- As the price/value/interest rates of the securities in which the Scheme invest fluctuates, the value of your investment in the Scheme may go up or down.
- Past performance of the Sponsor/AMC/Mutual Fund does not guarantee future performance of the Scheme.
- The name of the Scheme does not in any manner indicate either the quality of the Scheme or its future prospects and returns.
- The Sponsors are not responsible or liable for any loss resulting from the operation of the Scheme beyond the initial contribution of Rs. 1 lakh made by it towards setting up the Mutual Fund.
- The present Scheme does not guaranteed or assured return Scheme.

Additional Risk Factors for Foreign Investors:

1. Political Risk

Investments in mutual fund Units in India may be materially adversely impacted by Indian politics and changes in the political scenario in India either at the central, state or local level. Actions of the central government or respective state governments in the future could have a significant effect on the Indian economy, which could affect companies, general business and market conditions, prices and yields of securities in which the Scheme invest.

The occurrence of selective unrest or external tensions could adversely affect the political and economic stability of India and consequently have an impact on the securities in which the Scheme invests. Delays or changes in the development of conducive policy frameworks could also have an impact on the securities in which the Scheme invests.

2. Economic Risk

A slowdown in economic growth or macro-economic imbalances such as the increase in central and state level fiscal deficits may adversely affect investments in the country. The underlying growth in the economy is expected to have a direct impact on the volume of new investments in the country.

3. Foreign Currency Risk

The Scheme is denominated in Indian Rupees (INR) which is different from the home currency for Foreign Investors in the mutual fund Units. The INR value of investments when translated into home currency by Foreign Investors could be lower because of the currency movements. The AMC does not manage currency risk for foreign investors and it is the sole responsibility of the Foreign Investors to manage or reduce currency risk on their own. The Sponsor/Fund/Trustees/AMC are not liable for any loss to Foreign Investors arising from such changes in exchange rates.

4. Convertibility and Transferability Risk

In the event capital and exchange controls are imposed by the government authorities, it would prevent Foreign Investors' ability to convert INR into home currency and/or transfer funds outside India. The convertibility and transferability of INR proceeds into home currency is the responsibility of the Foreign Investors.

Scheme Specific Risk Factors

1. Market Liquidity Risk

The liquidity of investments made in the Scheme may be restricted by trading volumes, settlement periods and transfer procedures. Although the investment universe constitutes securities which will have adequate market liquidity, there is a possibility that market liquidity could get impacted on account of company/sector/general market related events and there could be a price impact on account of portfolio rebalancing and/or liquidity demands on account of redemptions.

Different segments of the Indian financial markets have different settlement periods and such periods may be extended significantly by unforeseen circumstances. There have been times in the past, when settlements have been unable to keep pace with the volume of securities transactions, making it difficult to conduct further transactions. Delays or other problems in settlement of transactions could result in temporary periods when the assets of the Scheme are uninvested and no return is earned thereon. The inability of the Scheme to make intended securities purchases, due to settlement problems, could cause the Scheme to miss certain investment opportunities. By the same token, the inability to sell securities held in the Scheme's portfolio, due to the absence of a well developed and liquid secondary market for debt securities, would result at times, in potential losses to the Scheme, should there be a subsequent decline in the value of securities held in the Scheme's portfolio.

Money market securities, while fairly liquid, lack a well-developed secondary market, which may restrict the selling ability of the Scheme and may lead to the Scheme incurring losses till the security is finally sold.

2. Rating Migration Risk:

Fixed income securities are exposed to rating migration risk, which could impact the price on account of change in the credit rating. For example: One notch downgrade of a AAA rated issuer to AA+ will have an adverse impact on the price of the security and vice-versa for an upgrade of a AA+ issuer.

3. Term Structure of Interest Rates (TSIR) Risk

The NAV of the Scheme's Units, to the extent that the Scheme is invested in fixed income securities, will be affected by changes in the general level of interest rates. When interest rates decline, the value of a portfolio of fixed income securities can be expected to rise. Conversely, when interest rates rise, the value of a portfolio of fixed income securities can be expected to decline.

4. Credit Risk

Fixed income securities (debt and money market securities) are subject to the risk of an issuer's inability to meet interest and principal payments on its debt obligations. The Investment Manager will endeavour to manage credit risk through in-house credit analysis.

Different types of securities in which the Scheme would invest as given in the SID carry different levels and types of credit risk. Accordingly the Scheme's risk may increase or decrease depending upon their investment patterns. E.g. corporate bonds carry a higher amount of credit risk than Government securities. Further, even among corporate bonds, bonds which are rated AAA are comparatively less risky than bonds which are AA rated.

5. Re-investment Risk

The investments made by the Scheme are subject to reinvestment risk. This risk refers to the interest rate levels at which maturity proceeds & cash flows received from the securities in the Scheme are reinvested. The risk is that the rate at which these cash flows can be reinvested may be lower than that originally assumed.

6. Risk associated with floating rate securities

To the extent the Scheme's investments are in floating rate debt instruments or fixed debt instruments swapped for floating rate return, they will be affected by: Interest rate movement (Basis Risk) - Coupon rates on floating rate securities are reset periodically in line with the benchmark index movement. Normally, the interest rate risk inherent in a floating rate instrument is limited compared to a fixed rate instrument. Changes in the prevailing level of interest rates will likely affect the value of the Scheme's holdings until the next reset date and thus the value of the Scheme's Units. The value of securities held by the Scheme generally will vary inversely with changes in prevailing interest rates. The Mutual Fund could be exposed to interest rate risk (i) to the extent of time gap in the resetting of the benchmark rates, and (ii) to the extent the benchmark index fails to capture interest rate changes appropriately; Spread Movement (Spread Risk) - Though the basis (i.e. benchmark) gets readjusted on a regular basis, the spread (i.e. markup) over benchmark remains constant. This can result in some volatility to the holding period return of floating rate instruments; Settlement Risk (Counterparty Risk) - Specific floating rate assets may also be created by swapping a fixed return into a floating rate return. In such a swap, there is the risk that the counterparty (who will pay floating rate return and receive fixed rate return) may default; Liquidity Risk: The market for floating rate securities is still in its evolutionary stage and therefore may render the market illiquid from time to time, for such securities that the Scheme is invested in.

7. Risk associated with derivatives

The Scheme may invest in fixed income derivatives for hedging and portfolio rebalancing or any other purposes as may be permitted under regulatory guidelines. The Scheme may use derivative instruments like Interest Rate Swaps, Forward Rate Agreements or other derivative as may be permitted by SEBI / RBI / such other Regulatory Authority from time to time.

The use of derivatives may expose the Scheme to a higher degree of risk. In particular, derivative contracts can be highly volatile, and the amount of initial margin is generally small relative to the size of the contract so that transactions may be leveraged in terms of market exposure. A relatively small market movement may have a potentially larger impact on derivatives than on standard bonds or equities. Leveraged derivative positions can therefore increase Scheme volatility.

Derivatives require the maintenance of adequate controls to monitor the transactions and the embedded market risks that they add to the portfolio. Besides the price of the underlying asset, the volatility, tenor and interest rates affect the pricing of derivatives. Other risks in using derivatives include but are not limited to:

- a. Counterparty Risk - this occurs when a counterparty fails to abide by its contractual obligations and therefore, the Schemes are compelled to negotiate with another counter party, at the then prevailing (possibly unfavourable) market price. For exchange traded derivatives, the risk is mitigated as the exchange provides the guaranteed settlement but one takes the performance risk on the exchange
- b. Market Liquidity risk - this occurs where the derivatives cannot be transacted due to limited trading volumes and/or the transaction is completed with a severe price impact.
- c. Model Risk - the risk of mis-pricing or improper valuation of derivatives
- d. Basis Risk arises due to a difference in the price movement of the derivative vis-à-vis that of the security being hedged

Identification and execution of the strategies to be pursued involve uncertainty and decision of the Investment Manager may not always be profitable. No assurance can be given that the Investment Manager will be able to identify or execute such strategies.

8. Risk associated with investments in repo of corporate debt securities

In repo transactions, also known as a repo or sale repurchase agreement, securities are sold with the seller agreeing to buy them back at later date. The repurchase price should be greater than the original sale price, the difference effectively representing interest. A repo is economically similar to a secured loan, with the buyer receiving corporate debt securities as collateral to protect against default. The Scheme may invest in repo of corporate debt securities which are subject to the following risks:

- a. **Counterparty Risk:** This refers to the inability of the seller to meet the obligation to buy back securities at the contracted price. The Investment Manager will endeavour to manage counterparty risk by dealing only with counterparties having strong credit profiles assessed through in-house credit analysis or with entities regulated by SEBI/RBI/IRDA
- b. **Collateral Risk:** In the event of default by the repo counterparty, the scheme have recourse to the corporate debt securities. Collateral risk arises when the market value of the securities is inadequate to meet the repo obligations. This risk is mitigated by restricting participation in repo transactions only in AA and above rated money market and corporate debt securities. In addition, appropriate haircuts are applied on the market value of the underlying securities to adjust for the illiquidity and interest rate risk on the underlying instrument.

9. Risks Associated With Transaction in Units Through Stock Exchange Mechanism

In respect of transactions in Units of the Scheme through NSE and/or BSE or any other recognized stock exchange, allotment and redemption of Units on any Business Day will depend upon the order processing/settlement by NSE, BSE or such other exchange and their respective clearing corporations on which the Mutual Fund has no control. Further, transactions conducted through the stock exchange mechanism shall be governed by the operating guidelines and directives issued by NSE, BSE or such other recognized exchange in this regard.

10. Risks associated with investments in Securitised Assets:

A securitization transaction involves sale of receivables by the originator (a bank, non-banking finance company, housing finance company, or a manufacturing/service company) to a Special Purpose Vehicle (SPV), typically set up in the form of a trust. Investors are issued rated Pass Through Certificates (PTCs), the proceeds of which are paid as consideration to the originator. In this manner, the originator, by selling his loan receivables to an SPV, receives consideration from investors much before the maturity of the underlying loans. Investors are paid from the collections of the underlying loans from borrowers. Typically, the transaction is provided with a limited amount of credit enhancement (as stipulated by the rating agency for a target rating), which provides protection to investors against defaults by the underlying borrowers.

Some of the risk factors typically analyzed for any securitization transaction are as follows:

- **Risks associated with asset class:** Underlying assets in securitised debt may assume different forms and the general types of receivables include commercial vehicles, auto finance, credit cards, home loans or any such receipts. Credit risks relating to these types of receivables depend upon various factors including macro economic factors of these industries and economies. Specific factors like nature and adequacy of collateral securing these receivables, adequacy of documentation in case of auto finance and home loans and intentions and credit profile of the borrower influence the risks relating to the asset borrowings underlying the securitised debt.
- **Risks associated with pool characteristics:**

(a) Size of the loan: This generally indicates the kind of assets financed with loans. While a pool of loan assets comprising of smaller individual loans provides diversification, if there is excessive reliance on very small ticket size, it may result in difficult and costly recoveries.

(b) Loan to Value Ratio: This indicates how much percentage value of the asset is financed by borrower's own equity. The lower LTV, the better it is. This ratio stems from the principle that where the borrower's own contribution of the asset cost is high, the chances of default are lower. To illustrate for a Truck costing Rs. 20 lakh, if the borrower has himself contributed Rs. 10 lakh and has taken only Rs. 10 lakh as a loan, he is going to have lesser propensity to default as he would lose an asset worth Rs. 20 lakh if he defaults in repaying an installment. This is as against a borrower who may meet only Rs. 2 lakh out of his own equity for a truck costing Rs. 20 lakh. Between the two scenarios given above, the later would have higher risk of default than the former.

(c) Original maturity of loans and average seasoning of the pool : Original maturity indicates the original repayment period and whether the loan tenors are in line with industry averages and borrower's repayment capacity. Average seasoning indicates whether borrowers have already displayed repayment discipline. To illustrate, in the case of a personal loans, if a pool of assets consist of those who have already repaid 80% of the installments without default, this certainly is a superior asset pool than one where only 10% of installments have been paid. In the former case, the portfolio has already demonstrated that the repayment discipline is far higher.

(d) Default rate distribution: This indicates how much % of the pool and overall portfolio of the originator is current, how much is in 0-30 DPD (days past due), 30-60 DPD, 60-90 DPD and so on. The rationale here is very obvious, as against 0-30 DPD, the 60-90 DPD is certainly a higher risk category.

- **Credit Rating and Adequacy of Credit Enhancement:** Unlike in plain vanilla instruments, in securitisation transactions, it is possible to work towards a target credit rating, which could be much higher than the originator's own credit rating. This is possible through a mechanism called "Credit enhancement". The process of "Credit enhancement" is fulfilled by filtering the underlying asset classes and applying selection criteria, which further diminishes the risks inherent for a particular asset class. The purpose of credit enhancement is to ensure timely payment to the investors, if the actual collection from the pool of receivables for a given period is short of the contractual payout on securitisation. Securitisation is normally non-recourse instruments and therefore, the repayment on securitisation would have to come from the underlying assets and the credit enhancement. Therefore the rating criteria centrally focus on the quality of the underlying assets.

The Scheme will predominantly invest in those securitisation issuances which have AA and above rating indicating high level of safety from credit risk point of view at the time of making an investment. However, there is no assurance by the rating agency either that the rating will remain at the same level for any given period of time or that the rating will not be lowered or withdrawn entirely by the rating agency.

- **Limited Liquidity & Price Risk:** Presently, the secondary market for securitised papers is not very liquid. There is no assurance that a deep secondary market will develop for such securities. This could limit the ability of the investor to resell them. Even if a secondary market develops and sales were to take place, these secondary transactions may be at a discount to the initial issue price due to changes in the interest rate structure.

- **Limited Recourse to Originator & Delinquency:** Securitised transactions are normally backed by pool of receivables and credit enhancement as stipulated by the rating agency, which differ from issue to issue. The Credit Enhancement stipulated represents a limited loss cover to the Investors. These Certificates represent an undivided beneficial interest in the underlying receivables and there is no obligation of either the Issuer or the seller or the originator, or the parent or any affiliate of the seller, issuer and originator. No financial recourse is available to the Certificate

Holder against the Investor's Representative. Delinquencies and credit losses may cause depletion of the amount available under the credit enhancement and thereby the investor payouts may get affected if the amount available in the credit enhancement facility is not enough to cover the shortfall. On persistent default of an obligor to repay his obligation, the servicer may repossess and sell the underlying Asset. However many factors may affect, delay or prevent the repossession of such asset or the length of time required to realize the sale proceeds on such sales. In addition, the price at which such asset may be sold may be lower than the amount due from that Obligor.

- **Risks due to possible prepayments: Weighted Tenor / Yield:** Asset securitisation is a process whereby commercial or consumer credits are packaged and sold in the form of financial instruments. Full prepayment of underlying loan contract may arise under any of the following circumstances;

- a. Obligor pays the receivable due from him at any time prior to the scheduled maturity date of that receivable; or

- b. Receivable is required to be repurchased by the seller consequent to its inability to rectify a material misrepresentation with respect to that Receivable; or

- c. The servicer recognizing a contract as a defaulted contract and hence repossessing the underlying asset and selling the same.

- d. In the event of prepayments, investors may be exposed to changes in tenor and yield.

- **Bankruptcy of the Originator or Seller:** If originator becomes subject to bankruptcy proceedings and the court in the bankruptcy proceedings concludes that the sale from originator to trust was not a sale then an Investor could experience losses or delays in the payments due. All possible care is generally taken in structuring the transaction so as to minimize the risk of the sale to Trust not being construed as a 'True Sale'. Legal opinion is normally obtained to the effect that the assignment of Receivables to Trust in trust for and for the benefit of the Investors, as envisaged herein, would constitute a true sale.

- **Bankruptcy of the Investor's Agent:** If Investor's agent, becomes subject to bankruptcy proceedings and the court in the bankruptcy proceedings concludes that the recourse of Investor's Agent to the assets/receivables is not in its capacity as agent/Trustee but in its personal capacity, then an Investor could experience losses or delays in the payments due under the agreement. All possible care is normally taken in structuring the transaction and drafting the underlying documents so as to provide that the assets/receivables if and when held by Investor's Agent is held as agent and in Trust for the Investors and shall not form part of the personal assets of Investor's Agent. Legal opinion is normally obtained to the effect that the Investor's Agent's recourse to assets/receivables is restricted in its capacity as agent and trustee and not in its personal capacity.

- **Risk of co-mingling:** The servicers normally deposit all payments received from the obligors into the collection account. However, there could be a time gap between collection by a servicer and depositing the same into the collection account especially considering that some of the collections may be in the form of cash. In this interim period, collections from the loan agreements may not be segregated from other funds of the servicer. If the servicer fails to remit such funds due to Investors, the Investors may be exposed to a potential loss. Due care is normally taken to ensure that the Servicer enjoys highest credit rating on standalone basis to minimize co-mingling risk.

- **Risks relating to tax incidence on securitization Special Purpose Vehicles:** In October 2011, the income tax authorities issued a claim on certain securitisation SPVs, stating that the gross income of such SPVs was liable to tax. The matter is presently under sub judice with the Bombay High Court. Several industry participants approached the Ministry of Finance (MoF) to seek clarity and reinforce the "pass through" status of a securitisation SPV. The Finance Bill, 2013, has sought

to clarify the tax position by stating that securitisation SPVs are not liable to pay income tax. However, any tax incidence on gross income of SPVs could result in dilution of payouts to investors.

B. RISK MANAGEMENT STRATEGIES

1. Market Liquidity Risk

The liquidity risk will be managed and/or sought to be addressed by creating a portfolio which has adequate access to liquidity. The Investment Manager will select fixed income securities, which have or are expected to have high secondary market liquidity. As far as other long dated fixed income securities are concerned, the endeavour will be to invest in high quality names, for example, bonds issued by public sector entities. Market Liquidity Risk will be managed actively within the portfolio liquidity limits.

2. Credit Risk

Credit Risk associated with fixed income securities will be managed by making investments in securities issued by borrowers, which have a good credit profile. The credit research process includes a detailed in-house analysis and due diligence. Limits are assigned for each of the issuer (other than government of India); these limits are for the amount as well as maximum permissible tenor for each issuer. The credit process ensures that issuer level review is done at inception as well as periodically by taking into consideration the balance sheet and operating strength of the issuer.

3. Term Structure of Interest Rates (TSIR) Risk

The Investment Manager will endeavour to actively manage the duration based on the ensuing market conditions.

4. Rating Migration Risk

The endeavour is to invest in high grade/quality securities. The due diligence performed by the fixed income team before assigning credit limits and the periodic credit review and monitoring should address company-specific issues.

5. Re-investment Risk

The Investment Manager will endeavor that besides the tactical and/or strategic interest rate calls, the portfolio is fully invested

6. Risk associated with floating rate securities

There is very low liquidity in floating rate securities, resulting in lack of price discovery. Hence, incremental investments in floating rate securities are going to be limited.

7. Risk associated with derivatives

The guidelines issued by SEBI / RBI from time to time for forward rate agreements and interest rate swaps and other derivative products would be adhered to.

8. Risk associated with investments in repo of corporate debt securities

The Investment Manager will endeavor to manage counterparty risk in corporate debt repos by dealing only with counterparties having strong credit profiles. These could include SEBI regulated mutual funds, RBI regulated Banks, Non-Banking Finance Companies, Primary Dealers and IRDA regulated Insurance companies. Corporates for whom credit limits have been assigned are eligible counterparties. These corporates should have a minimum investment grade credit rating. For new counterparties, approval from Head - Risk will be taken and an assessment will be done by the Risk & Quantitative Analysis team

The collateral risk is mitigated by restricting participation in repo transactions only in AA and above rated money market and corporate debt securities, where potential for downgrade/default is low. In

addition, appropriate haircuts are applied on the market value of the underlying securities to adjust for the illiquidity and interest rate risk on the underlying instrument.

C. REQUIREMENT OF MINIMUM INVESTORS IN THE SCHEME

The Scheme/Plans shall have a minimum of 20 investors each and no single investor shall account for more than 25% of the corpus of the Scheme(s)/Plan(s). These conditions shall be complied with, in each calendar quarter on an average basis, as specified by SEBI. In case of non-fulfillment of the condition of 20 investors in a calendar quarter, the provisions of Regulation 39(2)(c) of the SEBI (MF) Regulations shall become applicable automatically without any reference from SEBI, and accordingly the Scheme/ Plan(s) shall be wound up and the units redeemed at the relevant applicable NAV. If there is breach of the 25% limit by any investor over the quarter, a rebalancing period of one month would be available and thereafter, the investor who is in breach of the rule, shall be given 15 days notice to redeem his exposure over the 25% limit. Failure on the part of the said investor to redeem his exposure over the 25 % limit within the aforesaid 15 days would lead to automatic redemption on the applicable Net Asset Value on the 15th day of the notice period.

D. SPECIAL CONSIDERATIONS

- Subject to the SEBI (MF) Regulations, funds managed by the affiliates/associates of the Sponsors may invest either directly or indirectly in the Scheme and may acquire a substantial portion of the Schemes' Units and collectively constitute a majority investor in the Scheme. Accordingly, redemption of Units held by such funds may have an adverse impact on the value of the Units of the Scheme because of the timing of any such redemptions and may impact the ability of other Unit Holders to redeem their respective Units.
- As the liquidity of the Schemes' investments may sometimes be restricted by trading volumes and settlement periods, the time taken by the Mutual Fund for redemption of Units may be significant in the event of an inordinately large number of redemption requests or of a restructuring of the Schemes' portfolios. In view of this, the Trustee has the right, in its sole discretion, to limit redemptions under certain circumstances.

D. WHERE WILL THE SCHEME INVEST?

The Scheme will invest in debt and money market securities, which include, but are not limited to:

- Debt obligations of the Government of India, state and local governments, government agencies, statutory bodies, public sector undertakings, scheduled commercial banks, non-banking finance companies, development financial institutions, corporate entities and trusts (securitised debt)
- Interest rate and credit derivatives as permitted by SEBI
- Money market securities include commercial papers, commercial bills, treasury bills, Government securities having an unexpired maturity up to one year, call or notice money, certificate of deposit, usance bills, Collateralized Borrowing and Lending Obligation (CBLO), repurchase agreement (repo), reverse repurchase agreement (rev-repo), Bills Rediscounting Scheme (BRDS) and any other like instruments as specified by the Reserve Bank of India from time to time
- Pass through, Pay through or other Participation Certificates, representing interest in a pool of assets including receivables
- The non-convertible part of convertible securities
- Units of Mutual funds as may be permitted by regulations
- Structured Notes

Any other instruments/securities as may be permitted by RBI/SEBI/such other Regulatory Authority from time to time.

From time to time, it is possible that the Investment Manager may decide to invest a higher proportion in debt and money market securities, depending on prevailing economic and market conditions and the need to adopt a defensive posture on the portfolio of the Scheme.

The securities mentioned in, “**Where will the Scheme(s) invest?**”, could be listed, unlisted, privately placed, secured, unsecured, rated or unrated (subject to the rating or equivalency requirements discussed above) and of any maturity. The securities may be acquired through secondary market operations, primary issues/offerings, other public offers, Private Placement and negotiated deals amongst other mechanisms.

Collateralized Borrowing and Lending Obligations (CBLO):

Collateralized Borrowing and Lending Obligations (CBLO) is a money market instrument that enables entities to borrow and lend against sovereign collateral security. The maturity ranges from 1 day to 90 days and can also be made available upto 1 year. Central Government securities including T-bills are eligible securities that can be used as collateral for borrowing through CBLO.

Repos:

Repo (Repurchase Agreement) or Reverse Repo is a transaction in which two parties agree to sell and purchase the same security with an agreement to purchase or sell the same security at a mutually decided future date and price. The transaction results in collateralized borrowing or lending of funds.

Investment in Domestic Securitised Debt

Depending upon the Investment Manager's views, the Schemes may invest in domestic securitized debt such as ABS or MBS. The investments in domestic securitized debt will be made only after giving due consideration to factors such as but not limited to the securitization structure, quality of underlying receivables, credentials of the servicing agent, level of credit enhancement, liquidity factor, returns provided by the securitized paper vis-a-vis other comparable investment alternatives.

Although the returns provided by securitized debt could be higher, one must not lose sight of the fact that risks also exist with regard to investments in securitized debt. Investments in pass-through certificates of a securitization transaction represent an undivided beneficial interest in the underlying receivables and do not represent an obligation of either the issuer or the seller, or the parent of the seller, or any affiliate of the seller or the issuer or the trustee in its personal capacity, save to the extent of credit enhancement to be provided by the credit enhancer. The trust's principal asset will be the pool of underlying receivables. The ability of the trust to meet its obligations will be dependent on the receipt and transfer to the designated account of collections made by the servicing agent from the pool, the amount available in the cash collateral account, and any other amounts received by the trust pursuant to the terms of the transaction documents. However, the credit enhancement stipulated in a securitization transaction represents a limited loss cover only.

Delinquencies and credit losses may cause depletion of the amount available under the cash collateral account and thereby the scheduled payouts to the investors may get affected if the amount available in the cash collateral account is not enough to cover the shortfall.

Further Unit holders are requested to refer below the disclosure relating to investments in securitized debt, in the SEBI prescribed format:

(i) How the risk profile of securitized debt fits into the risk appetite of the scheme

The scheme seeks to generate an attractive return, consistent with prudent risk, from a portfolio which is substantially constituted of quality debt securities. The scheme also seeks to generate capital appreciation by investing a smaller portion of its corpus in equity and equity related securities of issuers domiciled in India.

In line with the investment objective, securitised debt instruments having a high credit quality commensurate with other debt instruments in the portfolio and in line with internal fund manager guidelines will be considered for investment.

(ii) Policy relating to originators based on nature of originator, track record, NPAs, losses in earlier securitized debt, etc

The parameters used to evaluate originators are

- Track record
- Willingness to pay, through credit enhancement facilities etc.
- Ability to pay
- Business risk assessment, wherein following factors are considered:
 - Outlook for the economy (domestic and global)
 - Outlook for the industry
 - Company specific factors

In addition a detailed review and assessment of rating rationale is done including interactions with the originator as well as rating agency.

Critical Evaluation Parameters (for pool loan) regarding the originator / underlying issuer:

- Default track record/ frequent alteration of redemption conditions / covenants
- High leverage ratios of the ultimate borrower - both on a standalone basis as well on a consolidated level/ group level

- Higher proportion of re-schedulement of underlying assets of the pool or loan, as the case may be
- Higher proportion of overdue assets of the pool or the underlying loan, as the case may be
- Poor reputation in market
- Insufficient track record of servicing of the pool or the loan, as the case may be.

(iii) Risk mitigation strategies for investments with each kind of originator

Analysis of originator: An independent Risk and Quantitative Analysis (RQA) team analyses and evaluates each originator and sets up limits specifying both the maximum quantum and maximum tenor for investments and investments are considered only within these limits.

Originator analysis typically encompasses:

- Size and reach of the originator
- Collection process, infrastructure and follow-up mechanism
- Quality of MIS
- Credit enhancement for different type of originator

(iv) The level of diversification with respect to the underlying assets, and risk mitigation measures for less diversified investments

Eligible assets: Only assets with an established track record of low delinquencies and high credit quality over several business cycles will be considered for investment.

Analysis of pool: Characteristics such as average pool maturity (in months), average loan to value ratio, average seasoning of the pool, maximum single exposure, geographical distribution and average single exposure are studied to determine pool quality

Risk mitigating measures: Credit enhancement facilities (including cash, guarantees, excess interest spread, subordinate tranches), liquidity facilities and payment structure are studied in relation to historical collection and default behavior of the asset class to ensure adequacy of credit enhancement in a stress scenario.

(v) Minimum retention period of the debt by originator prior to securitization

We will follow the guidelines on minimum holding period requirements as laid down by SEBI and RBI from time to time.

(vi) Minimum retention percentage by originator of debts to be securitized

We will follow the guidelines on minimum holding period requirements as laid down by SEBI and RBI from time to time.

(vii) The mechanism to tackle conflict of interest when the Mutual Fund invests in securitized debt of an originator and the originator in turn makes investments in that particular scheme of the Fund

The AMC has a rigorous credit due diligence process for all fixed income investments, which also encompasses securitized debt. A dedicated team of credit analysts is responsible for credit research and surveillance.

(viii) The resources and mechanism of individual risk assessment with the AMC for monitoring

investment in securitized debt

The AMC has a rigorous risk management process for all fixed income investments, which also encompasses securitized debt. A dedicated RQA team is responsible for monitoring risks including credit and liquidity risk. The functions of the RQA team include:

- Detailed credit analysis of issuers: based on the management evaluation, operating strength and financial strength to determine suitability for investment. Periodic reviews on a quarterly/annual basis are under taken for eligible issuers. Ratings are monitored on a daily basis and any changes are immediately recorded and suitable action taken.
- RQA team monitors adherence to single and group level exposure norms, minimum rating requirements, liquidity requirements, and ensures that only eligible securities are included in the fund, in line with the scheme information document/internal templates.

For securitized pool loan exposures, the analysis includes pool seasoning, pool asset quality, diversification, collateral margin, originator analysis and credit enhancement mechanisms. Pool performance statistics published by rating agencies are analyzed for performance of other securitised pools of the same originator as well as for the performance of the asset class as a whole. Regular interactions with the rating agencies are done to discuss performance trends. Documents are vetted by the legal and compliance team. In addition, monthly payout reports from the trustees are analysed for collection performance and adequacy of cash collateral.

Overview of Corporate Debt Market in India

The Indian bond market comprises mainly of Government securities, bond issued by Public Sector Undertakings (PSU), Development Financial Institutions (DFI) and Infrastructure-related agencies, debentures and money market instruments issued by the corporate sectors and banks.

The Indian bond market has also witnessed increased issuance of bonds from government-sponsored institutions, DFIs, and infrastructure-related agencies since 1995. These bonds are rated by credit rating agencies like CRISIL, ICRA, CARE, FITCH and Brickworks. They constitute reasonable amount of the trading volume on the Wholesale Debt Market platform of National Stock Exchange. They are widely held by market participants because of their liquidity and reduced risk perception due to the government stake in some of them.

The Indian corporate sector has also been frequently raising capital through issuance of non-convertible debentures and commercial papers. Most of the money is raised through the "Private placement" route. These debentures are mostly rated by rating agencies. While some of them trade very actively, most of them are not very liquid. Because of this, they normally trade at a marginally higher yield than bonds issued by PSU and other government-sponsored agencies.

Indian private sector banks routinely issue Certificate of Deposits to investors at attractive rates. They are less liquid when compared to Treasury Bills but more liquid as compared to commercial papers.

Commercial papers are compulsorily rated by rating agencies such as CRISIL, ICRA, CARE, FITCH and Brickworks. They are issued for a tenor ranging from 7 days to 364 days. They are mostly issued in dematerialised form. Commercial papers are relatively liquid instruments.

Overview of Money Market in India

Money market assets comprise Treasury Bills, Cash Management Bills, Call Money, Collateralized Borrowing and Lending Obligations (CBLO), Repo, Clearcorp Repo Order Matching System (CROMS), Fixed Deposits,

Commercial Papers, Certificate of Deposits, BRDS and any other assets approved by the Reserve Bank of India from time to time. Money market assets are liquid and actively traded segment of fixed income markets.

Investments in derivatives

SEBI vide its circular no. MFD/CIR/011/061/2000 dated February 1, 2000 has permitted all the mutual funds to participate in the derivatives trading subject to observance of guidelines issued by SEBI in this behalf. Pursuant to this, the mutual funds may use various derivative and hedging products from time to time, as would be available and permitted by SEBI, in an attempt to protect the value of the portfolio and enhance Unit holders' interest.

Derivatives are financial contracts of pre-determined fixed duration, whose values are derived from the value of an underlying primary financial instrument, commodity or index, such as interest rates, exchange rates, commodities, and equities.

The fixed Income derivative market has made considerable progress in last two years. Interest rate swaps have become an integral part of Risk Management practice for most banks. Corporate Treasury have issued Innovative instruments like floating rate debt and constant maturity swaps.

1. Interest Rate Swap (IRS)

Any swap is effectively an exchange of one set of cash-flows for another considered to be of equal value. If the exchange of cash flows is linked to interest rates, it becomes an interest rate swap.

An interest rate swap is an agreement between two parties to exchange future payment streams based on a notional amount. Only the interest on the notional amount is swapped, and the principal amount is never exchanged.

In a typical interest rate swap, one party agrees to pay a fixed rate over the term of the agreement and to receive a variable or floating rate of interest. The counterparty receives a stream of fixed rate payments

at regular intervals as described in the agreement and pays the floating rate of interest. A fixed/ floating interest rate swap is characterized by:

1. Fixed interest rate;
2. Variable or floating interest rate, which is periodically reset;
3. Notional principal amount upon which total interest payments are based; and
4. The terms of the agreement, including a schedule of interest rate reset dates, payment dates and termination date.

The primary reason for engaging in an interest rate swap is to hedge the interest rate exposure. An illustration could be an institution having long-term fixed rate assets (longer tenor securities receiving fixed rate) in a rising interest rate environment; it can hedge the interest rate exposure by purchasing an interest rate swap where the institution receives floating interest rate and pays fixed rate. In this case, an interest rate swap is likely to reduce the duration and interest rate volatility of the fund.

Example:

Terms:

Fixed Interest Rate : 8.50% p.a.
Variable Interest Rate : NSE Over-Night MIBOR reset daily and compounded daily
Notional Principal Amount : Rs.100 Crore
Period of Agreement : 1 year
Payment Frequency : Semi-annual

Now, suppose the six-month period from the effective date of the swap to the first payment date comprises 182 days and the daily compounded NSE Over-Night MIBOR is 8.15% p.a. on the first payment date, then the fixed and variable rate payment on the first payment date would be as follows:

Fixed rate payment:

$\text{Rs. } 4,23,83,562 = (\text{Rs. } 100,00,00,000) \times (8.50\%) \times (182 \text{ Days} / 365 \text{ Days})$

Variable rate payment:

$\text{Rs. } 4,06,38,356 = (\text{Rs. } 100,00,00,000) \times (8.15\%) \times (182 \text{ Days} / 365 \text{ Days})$

Often, a swap agreement will call for only the exchange of net amount between the counterparties. In the above example, the fixed-rate payer will pay the variable-rate payer a net amount of Rs. 17,45,205 = Rs. 4,23,83,562 - Rs. 4,06,38,356.

The second and final payment will depend on the daily NSE MIBOR compounded daily for the remaining 183 days. The fixed rate payment will also change to reflect the change in holding period from 182 days to 183 days.

2. Forward Rate Agreement (FRA)

An FRA is an off balance sheet agreement to pay or receive on an agreed future date, the difference between an agreed interest rate and the interest rate actually prevailing on that future date, calculated on an agreed notional principal amount. It is settled against the actual interest rate prevailing at the beginning of the period to which it relates rather than paid as a gross amount.

An FRA is referred to by the beginning and end dates of the period covered. Thus a 5x8 FRA is one that covers a 3-month period beginning in 5-months and ending in 8-months. FRAs are purchased to hedge the interest rate risk; an investor facing uncertainty of the interest rate movements can fix the interest costs by purchasing an FRA.

An illustration could be a corporation having floating rate debt linked to an index such as say, 3-Month MIBOR. If the existing interest cost is at 8% on Rs.100 Crore for the next three months, the corporation can purchase a 3x6 FRA @ 8.1% on Rs.100 Crore and fix the interest cost for the 3-6 months period. If the actual 3-Month MIBOR after 3-months is at 8.25%, the corporation has saved 15 bps in interest cost. As the settlement is done at the beginning of the period, the savings in interest expense are discounted to a present value using a 3-month rate to calculate the actual settlement amount.

The flows for the institution will be, as follows:

Interest Savings = Rs. 100 Crore * 15 bps * 92/365
 (assuming 92 days in the 3 month FRA period and 365 days in the conventional year)

= Rs.3,78,082.19

Settlement Amount = Rs.3,78,082.19/ (1+8.25%*92/365)

Please note that the above examples are hypothetical in nature and the figures are assumed.

3. Interest Rate Futures

An Interest Rate Futures ('IRF') contract is "an agreement to buy or sell a debt instrument at a specified future date at a price that is fixed today." The underlying security for Interest Rate Futures is either Government Bond or T-Bill. Interest Rate Futures are Exchange traded and standardized contracts based on 6 year, 10 year and 13 year Government of India Security and 91-day Government of India Treasury Bill (91DTB). These future contracts are cash settled. These instruments can be used for hedging the underlying cash positions.

For example, assume a portfolio has Rs. 100 crores of Government security 7.59% GOI 2026 with face value Rs. 100/-. The bond is currently trading in market at 105.00.

The futures on 7.59% GOI 2026, expiring on 26th October 2017 is trading on exchange at 105.10.

Instead of exiting the cash position, the fund manager can decide to hedge the position by selling the same quantity in futures. Since one contract of IRF has a notional of Rs. 2 lakhs, in this example the fund manager sells Rs. 100 crores/2 lakhs = 5000 contracts, to hedge his position.

At maturity, the settlement price of the futures will be almost same as closing price of the underlying security.

At maturity of the Interest Rate Futures

Case 1: At maturity Bonds close higher than the price at which fund manager hedged the position, but below the futures price at which he hedged

Closing price of Bonds on day of maturity of futures = 105.05

Settlement price of futures = 105.05

MTM gain on the underlying bond = (105.05-105.00) * 100 crores / 100 (i.e. face value of bond)
 = Rs. 5,00,000

The profit on the futures leg is = 5000*2lakhs *(105.10-105.05)/ 100 (i.e. face value of bond)
 = Rs 5,00,000

Overall profit to the fund = Rs 10,00,000

Case 2: At maturity bonds close higher than the level at which futures were sold

In case, the closing price of bonds on the day of maturity of futures = 105.20,

Settlement price of futures = 105.20

The MTM gain on bonds = (105.20-105.00) * 100 crores /100 (i.e. face value of bond)
 = Rs. 20,00,000

Loss on futures leg = 5000*2 lakhs * (105.10-105.20) /100 (i.e. face value of bond)
 = (Rs 10,00,000)

Total Profit to the fund = Rs 10,00,000

Case 3: At maturity bonds sells off from levels were hedges were initiated
 In case, the closing price of bonds on the day of maturity of futures = 104.80,
 Settlement price of futures = 104.80

The MTM loss on bonds = $(104.80-105.00) * 100$ crores
 = (Rs. 20,00,000)
 Profit on futures leg = $5000*2$ lacs * $(105.10-104.80)$
 = Rs 30,00,000
 Total Profit to the fund = Rs 10,00,000”

Please note that the above examples are hypothetical in nature and the figures are assumed.

With respect to investments made in derivative instruments, the Scheme shall comply with the following exposure limits in line with SEBI Circular Cir/IMD/DF/11/2010 dated August 18, 2010:

1. The cumulative gross exposure through equity, debt and derivative positions will not exceed 100% of the net assets of the respective Scheme. However, the following shall not be considered while calculating the gross exposure:

Further, the value of the notional principal in such cases must not exceed the value of respective existing assets being hedged by the scheme. Exposure to a single counterparty in such transactions should not exceed 10% of the net assets of the scheme.

However, certain derivative positions may theoretically have unlimited possible loss. Exposure in derivative positions shall be computed as follows:

Position	Exposure
Long Future	Futures Price * Lot Size * Number of Contracts
Short Future	Futures Price * Lot Size * Number of Contracts
Option Bought	Option Premium Paid * Lot Size * Number of Contracts

If these limits are exceeded for reasons beyond its control, the AMC shall adopt as a priority objective the remedying of that situation, taking due account of the interests of the Unit Holders.

Apart from the Investment Restrictions prescribed under the SEBI (MF) Regulations, there are internal risk parameters for limiting exposure to a particular security, country or sector. 3. Dividend Policy

(i) Growth Option

Under this option, the Mutual Fund will not declare any dividend. The income earned by the Scheme will remain invested in the Scheme concerned and will be reflected in the NAV. This Option is suitable for investors who are not looking for current income but who have invested only with the intention of capital appreciation. Moreover, if Units under this Option are held as a capital asset for a period of greater than 36 months from the date of acquisition, Unit Holders should get the benefit of long term capital gains tax. Please refer the section “A. Taxation on investing in Mutual Funds” in the SAI.

(ii) Dividend Option / Monthly Dividend Option / Weekly Dividend Option / Quarterly Dividend Option

The above options are suited for investors seeking income through dividend declared by the Scheme. Only Unit Holders opting for such option(s) will receive dividends. Under these options, the Scheme envisage declaring dividends comprising substantially of net income and realized gains.

The options stated in point (ii) above, in turn offer two sub-options i.e. “Payout Dividend” or “Reinvest Dividend”

• Payout Dividend

As per the SEBI (MF) Regulations, the Mutual Fund shall despatch to the Unit Holders, dividend warrants within 30 days of declaration of the Dividend. Dividends will be payable to those Unit Holders whose names appear in the Register of Unit Holders on the date (Record Date). Dividends will be paid by cheque, net of taxes as may be applicable. Unit Holders will also have the option of direct payment of dividend to the bank account. The cheques will be drawn in the name of the sole/first holder and will be posted to the Registered address of the sole/first holder as indicated in the original application form entirely at the risk of the unitholders. **To safeguard the interest of Unit Holders from loss or theft of dividend cheques, investors should provide the name of their bank, branch and account number in the application form. Dividend cheques will be sent to the Unit Holder after incorporating such information.**

If the dividend amount payable to Unit holders (net of tax deducted at source, wherever applicable) is for:

- i. an amount less than Rs. 10, 000/- in case of Weekly Dividend Payout sub-option under Regular Plan (under which the subscription/switch in/SIP/STP-ins is available)/Direct Plan of the Scheme;
- ii. an amount equal to or less than Rs. 250/- in case of payout sub options of Dividend, Monthly Dividend and Quarterly Dividend under Regular Plan Plan (under which the subscription/switch in/SIP/STP-ins is available)/Direct Plan of the Scheme;

The dividend amount payable will be compulsorily and automatically reinvested in the respective Scheme/Plan by issuing additional Units of the Scheme/Plan at the Applicable NAV on the next Business day after the Record Date. There shall be no load on dividend so reinvested.

• Reinvest Dividend

Under this sub-option, dividends will be reinvested by way of additional Units of the Scheme instead of being paid out. Such reinvestment will be at the applicable NAV on the next Business Day after the Record Date. There shall however, be no entry load/exit load, if any, on the dividends so reinvested. The dividends so reinvested shall be constructive payment of dividends to the Unit Holders and constructive receipt of the same amount from each Unit Holder, for reinvestment in Units. The additional Units issued under this option and held as capital asset would get the benefit of long term capital gains if sold after being held for greater than 36 months. For this purpose, 36 months will be computed from the date when such additional Units are issued/allotted.

(iii) Weekly Dividend Reinvest Option / Daily Dividend Reinvest Option

Under these options, the Scheme envisage declaring dividends comprising substantially of net income and realised gains. The dividends declared would be compulsorily reinvested by way of additional Units in the Schemes instead of being paid out in cash. When such additional Units are issued, account statements will be issued to the Unit Holders only upon receipt of a specific request for the same from the Unit Holder. The dividends so reinvested shall be constructive payment of dividends to the Unit Holders and constructive receipt of the same amount from each Unit Holder, for reinvestment in Units. The additional Units issued under this option and held as capital asset would get the benefit of long term capital gains if sold after being held for greater than 36 months. For this purpose, 36 months will be computed from the date when such additional Units are issued/allotted. There shall however, be no entry load, if any, on the dividends so re-invested.

All Units will rank pari passu, among Units within the same Option in each Scheme or within the same Option in the relevant Plan of the Scheme concerned, as to assets, earnings and the receipt of dividend distributions, if any, as may be declared by the Trustee. However, the receipt of dividend distribution will be subject to: (i) categorisation of investors for applicability of statutory levies; and (ii) distribution tax/surcharge/cess/any other levy payable by the scheme in respect of separate category of investors, if applicable.

The dividend declared under the Dividend Reinvest options under Discontinued Plan, will be reinvested in the corresponding options of the Regular Plan ('Continuing Plan') of the Scheme.

Unit Holder(s) of the aforesaid Schemes can seek payout of dividend, provided the option has Payout Facility, by submitting the written request at any of the Official Point of Acceptance of Transactions (OPAT) of the AMC/CAMS.

Effect of Dividend: The NAV of the Unit Holders in Dividend Option, Monthly Dividend Option, Daily Dividend Reinvest Option, Weekly Dividend Option, and Quarterly Dividend option will stand reduced by the amount of dividend declared.

On declaration of dividend, the NAV of the respective dividend option will further stand reduced by the applicable dividend distribution tax/surcharge/cess/any other statutory levy. Notwithstanding varying rates of statutory levies, the exdividend NAV will remain the same for all categories of investors in a particular option, though the amount of dividend received by Unit Holders may vary depending on the category of each Unit Holder.

For details on taxation of dividend please refer the SAI.

Notes:

18. Account Statements

Under Regulation 36(4) of SEBI (Mutual Funds) Regulations, 1996, the AMC/ RTA is required to send consolidated account statement for each calendar month to all the investors in whose folio transaction has taken place during the month. Further, SEBI vide its circular ref. no. CIR/MRD/DP/31/2014 dated November 12, 2014, in order to enable a single consolidated view of all the investments of an investor in Mutual Fund and securities held in demat form with Depositories, has required Depositories to generate and dispatch a single consolidated account statement for investors having mutual fund investments and holding demat accounts.

In view of the said requirements the account statements for transactions in units of the Fund by investors will be dispatched to investors in following manner:

I. Investors who do not hold Demat Account

- Consolidated account statement[^], based on PAN of the holders, shall be sent by AMC/ RTA to investors not holding demat account, for each calendar month within 10th day of the succeeding month to the investors in whose folios transactions have taken place during that month.
- Consolidated account statement shall be sent by AMC/RTA every half yearly (September/ March), on or before 10th day of succeeding month, detailing holding at the end of the six month, to all such investors in whose folios there have been no transactions during that period.
[^]Consolidated account statement sent by AMC/RTA is a statement containing details relating to all financial transactions made by an investor across all mutual funds viz. purchase, redemption, switch, dividend payout, dividend reinvestment, systematic investment plan, systematic withdrawal plan, systematic transfer plan, bonus etc. (including transaction charges paid to the distributor) and holding at the end of the month.

II. Investors who hold Demat Account

- Consolidated account statement^{^^}, based on PAN of the holders, shall be sent by Depositories to investors holding demat account, for each calendar month within 10th day of the succeeding month to the investors in whose folios transactions have taken place during that month.
- Consolidated account statement shall be sent by Depositories every half yearly (September/ March), on or before 10th day of succeeding month, detailing holding at the end of the six month, to all such investors in whose folios and demat accounts there have been no transactions during that period.
- In case of demat accounts with nil balance and no transactions in securities and in mutual fund folios, the depository shall send account statement in terms of regulations applicable to the depositories.
^{^^}Consolidated account statement sent by Depositories is a statement containing details relating to all financial transactions made by an investor across all mutual funds viz. purchase, redemption, switch, dividend payout, dividend reinvestment, systematic investment plan, systematic withdrawal plan, systematic transfer plan, bonus etc. (including transaction charges paid to the distributor) and transaction in dematerialised securities across demat accounts of the investors and holding at the end of the month.

Following provisions shall be applicable to CAS sent through AMC/ RTA and CAS sent through depositories:

- a. Investors are requested to note that for folios which are not included in the CAS, AMC shall henceforth issue monthly account statement to the unit holders, pursuant to any financial transaction done in such folios; the monthly statement will be sent on or before tenth day of succeeding month. Such statements shall be sent in physical form if no email id is provided in the folio.
- b. The statement sent within the time frame mentioned above is provisional and is subject to realisation of payment instrument and/or verification of documents, including the application form, by the RTA/AMC.
- c. In the event the folio/demat account has more than one registered holder, the first named Unit holder/Account holder shall receive the CAS (AMC/RTA or Depository). For the purpose of CAS (AMC/RTA or Depository), common investors across mutual funds/depositories shall be identified on the basis of PAN. Consolidation shall be based on the common sequence/ orders of investors in various folios/demat accounts across mutual funds / demat accounts across depository participants.
- d. Investors whose folio(s)/demat account(s) are not updated with PAN shall not receive CAS. Investors are therefore requested to ensure that their folio(s)/demat account(s) are updated with PAN. For folios not included in the CAS (due to non-availability of PAN), the AMC shall issue monthly account statement to such Unit holder(s), for any financial transaction undertaken during the month on or before 10th of succeeding month by mail or email.

For folios not eligible to receive CAS (due to non-availability of PAN), the AMC shall issue an account statement detailing holding across all schemes at the end of every six months (i.e. September/March), on or before 10th day of succeeding month, to all such Unit holders in whose folios no transaction has taken place during that period shall be sent by mail/e-mail.

- e. For Unit Holders who have provided an e-mail address in KYC records, the CAS will be sent by e-mail.
- f. The Unit Holder may request for a physical account statement by writing to/calling the AMC/RTA. In case of a specific request received from the unit holders, the AMC/RTA shall provide the account statement to the unit holders within 5 business days from the receipt of such request.
- g. Account Statements shall not be construed as proof of title and are only computer printed statements indicating the details of transactions under the Scheme during the current financial year and giving the closing balance of Units for the information of the Unit Holder.
- h. Non-transferable Unit Certificates will be sent, if an applicant so desires, within 5 Business Days of the receipt of a request for the certificate. Unit Certificates will not be issued for any fractional Units entitlement.
- i. Units held, either in the form of Account Statement or Unit Certificates, are non-transferable. The Trustee reserves the right to make the Units transferable at a later date subject to SEBI (MF) Regulations issued from time to time.

19. Dividend Warrants

Dividend warrants shall be dispatched to the Unit Holders within 30 days of the date of declaration of the dividend. In the event of delay/failure to despatch the dividend warrants within the aforesaid 30 days, the AMC will be liable to pay interest to the Unit Holders at such rate as may be specified by SEBI for the period of such delay (currently @ 15% per annum).

20. Redemption

Units can be redeemed (sold back to the Mutual Fund) at the relevant Redemption Price. The redemption requests can be made on the pre-printed forms (transaction slip/common transaction form) or by using the form at the bottom of the account statement. The redemption request can be submitted at any of the Official Points of Acceptance of transaction, the details of which are mentioned at the end of this SID. As all allotments are provisional, subject to realization of payment instrument and subject to the AMC having been reasonably satisfied that the Mutual Fund has received clear funds, any redemption or switch out transaction in the interim is liable to be rejected at the sole discretion of the AMC.

The Redemption request can be made for any amount of Rs. 500/- or more. A unit Holder may request redemption of a specified amount or a specified number of Units only. If the redemption request is made for a specified amount and the number of Units is also specified by the Unit Holder, the number of Units specified will be considered for deciding the redemption amount. Unit Holders may also request for redemption of their entire holding and close the account by indicating the same at an appropriate place in the transaction slip/common transaction slip.

In case an investor has purchased Units on more than one day (either under the NFO period or through subsequent purchase) the Units purchased first (i.e. those Units which have been held for the longest period of time), will be deemed to have been redeemed first, i.e. on a First-In-First-Out basis.

In case the Units are standing in the names of more than one Unit Holder, where mode of holding is specified as 'Joint', redemption requests will have to be signed by all joint holders. However, in cases of holding specified as 'Anyone or Survivor', any one of the Units Holders will have the power to make redemption requests, without it being necessary for all the Unit Holders to sign. However, in all cases, the proceeds of the redemption will be paid to the first-named holder only.

Redemption or repurchase proceeds shall be dispatched to Unit Holders within 10 working days from the date of redemption or repurchase. However, under normal circumstances, the Mutual Fund will endeavour to despatch the redemption proceeds, by courier, where such facilities are available, within 2 Business Day from the date of acceptance of the redemption request at any of the official points of acceptance of transaction. Unit holders are advised to submit their requests for change in bank mandate atleast 10 days prior to date of redemption/dividend payment, if any. The AMC reserves the right to extend/modify the timelines on a case to case basis. Any unregistered bank account or a new bank account mentioned by the Unit holder along with the redemption request shall not be considered for payment of redemption /dividend proceeds.

The redemption cheque will be issued in favour of the sole/first Unit Holder's registered name and bank account number, if provided, and will be sent to the registered address of the sole/first Holder as registered with the Registrar. The redemption cheque/demand draft will be payable at par at all the places where the official points of acceptance of transaction are located. Bank charges for collection of cheques at all other places will be borne by the Unit Holder. With a view to safeguarding their interest, it is desirable that Unit Holders indicate their Bank Account No., name of the bank and branch in the application for purchasing Units of the Scheme. A fresh account statement will also be sent/emailed to redeeming investors, indicating the new balance to the credit in the account, along with the redemption cheque.

The Mutual Fund may, at its discretion and without any notice, redeem the balance Units in the Scheme (in a particular folio) if the value of the balance Units in the Scheme (in a particular folio) falls below Rs. 1000/- and at least 6 months have elapsed since his/her/its first investment in the Scheme. The Investment Manager may change the rules relating to this facility from time to time.

Unit holders are requested to note that application for redemption or switch out for units for which funds are not realized via purchase or switch-in in the Scheme of the Fund shall be liable to be rejected. In other words, redemption of units will be processed only if the funds for such units are realized in the Scheme by a way of payment instructions/transfer or switch-in funding process.

The proceeds towards redemptions and dividends will be dispatched by a reasonable mode of despatch like courier, post, etc. in case of cheque/demand draft or directly credited to the bank account (as per the details mentioned by the investor) in case of direct credit facility, entirely and solely at the risk of the investor. The Mutual Fund will endeavour to remit redemption proceeds via electronic means, as made available by RBI. Where such electronic means are not available or feasible under any circumstances, the Mutual Fund will remit the redemption proceeds by way of cheques. The investor will not hold the Mutual Fund or the AMC or the Registrar responsible for any non-receipt or delay of receipt of redemption & dividend proceeds due to any negligence or deficiency in service by the courier company, postal authorities or the bank executing direct credits, or due to incorrect bank account details provided by the investor.

Redemption by NRIs and FPIs

Credit balances in the account of an NRI/FPI investor may be redeemed by such investors in accordance with the procedure described above and subject to the procedures laid down by RBI, if any. Such redemption proceeds will be paid by means of a Rupee cheque payable to the NRI's/FPIs or by a foreign currency draft drawn at the then rates of exchange less bank charges, subject to RBI procedures and approvals.

Effect of Redemption

On redemption, the unit capital and reserves will stand reduced by an amount equivalent to the product of the number of Units redeemed and the Redemption Price as on the date of redemption. Units once redeemed will be extinguished and will not be re-issued.

Fractional Units

Since a request for purchase is generally made in Rupee amounts and not in terms of number of Units of the Scheme, a Unit Holder may be left with fractional Units. Fractional Units will be computed and accounted for up to three decimal places. However, fractional Units will, in no way, affect the Unit Holder's ability to redeem the Units, either in part or in full, standing to his/her/its credit.

Redemption by investors transacting through the Stock Exchange mechanism

Investors who wish to transact through the stock exchange shall place orders for redemptions as currently practiced for secondary market activities. Investors must submit the Delivery Instruction Slip to their Depository Participant on the same day of submission of redemption request, within such stipulated time as may be specified by NSE/BSE, failing which the transaction will be rejected. Investors shall seek redemption requests in terms of number of Units only and not in Rupee amounts. Redemption amounts shall be paid by the AMC to the bank mandate registered with the Depository Participant. Refer "Trading in Units through Stock Exchange mechanism" under 'A. New Fund Offer Details', for detailed provisions.

Redemption by investors who hold Units in dematerialized form

Redemption request for Units held in demat mode shall not be accepted at the offices of the Mutual Fund/AMC/Registrar. Unit holders shall submit such request only through their respective Depository Participant.

21. Delay in payment of redemption / repurchase proceeds

As per SEBI (MF) Regulations, the Mutual Fund shall despatch the redemption proceeds within 10 Business Days from the date of acceptance of redemption request. In the event of delay/failure to despatch the redemption/repurchase proceeds within the aforesaid 10 Business Days, the AMC will be liable to pay interest to the Unit Holders at such rate as may be specified by SEBI for the period of such delay (currently @ 15% per annum).

22. Bank Mandate

It is mandatory for every applicant to provide the name of the bank, branch, address, account type and number as per requirements laid down by SEBI and any other requirements stated in the Application Form. Applications without these details will be treated as incomplete. Such incomplete applications will be rejected. The Registrar/AMC may ask the investor to provide a blank cancelled cheque or its photocopy for the purpose of verifying the bank account number.

Investor/s or /Unit Holder/s are requested to note that any one of the following documents shall be submitted by the investor/s or /Unit Holder/s, in case the cheque provided along with fresh subscription/new folio creation does not belong to the bank mandate specified in the application form:

As part of the settlement, BlackRock, without admitting or denying any wrongdoing, agreed to pay a \$12 million fine, and agreed to appoint an independent compliance consultant to review BlackRock’s outside activities policy and monitoring procedures. The proposed settlement was approved by the SEC on April 16, 2015, and publicly announced by the SEC on April 20, 2015.
 - On December 12, 2014, the Swedish securities regulator (“Swedish FSA”) requested information from BlackRock regarding a late threshold report filed by BlackRock in October 2014. The report, which concerned BlackRock’s holding of Assa Abloy AB, was required to be filed in June 2014. BlackRock responded to the request in January 2015.
